

Timber Blinds

**Sunteca**

# Sunteca

**Sunteca Timber Blinds** - The natural beauty of wood with its warmth and durability make your windows a real fashion statement. Available in Western Red Cedar or Basswood with a choice of finishes and stains which give you the opportunity to change the appearance of your rooms. Also consider the Creation Timber alternatives which are excellent for wet areas.

**Sunteca Canadian Western Red Cedar** blinds are selected for stability, natural colour and grain variations giving you a truly unique blind every time. The timber comes from sustainable timber plantations with a slat width of 46mm.

**Sunteca Basswood** blinds are available in colours to suit your decor and come in a slat width of 50mm. Basswood is a very durable timber which resists warping, is not easily effected by water and high temperature, is sturdy and has an attractive fine texture plus a smooth finish.

**Creation Timber Blinds** offer a practical alternative to timber blinds. They capture the look of real wood yet are manufactured from advanced engineered polymers. They are resistant to fading, peeling, cracking and warping. At less cost than traditional timber blinds and with a 50mm wide blade, they are designed for durability. Creation Timber blinds are suitable for areas of high humidity, extreme temperatures and direct sunlight. Completely washable with a range of colours to complement any decor.

All **Sunteca Timber Blinds** and **Creation Blinds** are manufactured in Western Australia to suit your windows using components that suit the WA weather conditions. They are fitted with child safety devices.
